Re: Comparision of Product Testing Methodologies

Dear Prof Thomas Tran,

Enclosed is a copy of my work-term report for the summer 2012 term entitled *Comparision of Product Testing Methodologies*. It was written pursuant to the requirements of the SEG 4902 – CO-OP Work Term Report V course.

During the May to August 2012 period, I worked for Curtiss Wright Controls Defence Solutions (CWCDS). Their office is located at 333 Palladium Dr, Ottawa, Ontario. During my term at CWCDS, I worked as a Software Engineering Coop Student working on various projects. My supervisor for the part of summer was Chris Stassen.

While on my term, I worked as a member of a few different teams, depending on the project. Sometimes I worked as part of a multi-disciplined team of 6, including mechanical, hardware and software engineers, or I worked as part of a single-disciplined team of about 6 software engineers, and sometimes I worked alone.

My summer 2012 work term was my fifth and final work term with the University of Ottawa and followed my 4A study term completed in winter 2012. However, I have previously completed 3 work terms when I attended the University of Waterloo during the period of 2004 to 2006.

I hereby confirm this report is my own work and that I have received no further help.

Sincerely,

_____
Jeffrey Arcand
